

# MANSOUR MOHAMED AHMED

Flutter Mobile Developer

+20 1123491489 • mm9256127@gmail.com • Cairo, Egypt • [LinkedIn](#) • [GitHub](#)

---

## PROFESSIONAL SUMMARY

Motivated Flutter Mobile Developer and fresh graduate with a Bachelor's degree in Information Technology and Computer Science from Sinai University (2024). Skilled in building cross-platform mobile applications using Flutter & Dart, with hands-on experience in Firebase integration, state management (BLoC/Cubit, Provider, GetX), and clean architecture. Trained at NTI and ITI — Egypt's leading tech institutions. Demonstrated ability through real-world projects including a full-cycle home services platform and a comprehensive dental clinic management system. Passionate about writing clean, maintainable code and delivering high-quality user experiences.

## TECHNICAL SKILLS

|                               |                                                                                                        |
|-------------------------------|--------------------------------------------------------------------------------------------------------|
| <b>Mobile Development</b>     | Flutter, Dart — cross-platform iOS & Android                                                           |
| <b>Backend &amp; Database</b> | Firebase (Firestore, Authentication, Storage, Cloud Functions), RESTful APIs Integration               |
| <b>State Management</b>       | BLoC / Cubit, Provider, GetX                                                                           |
| <b>Architecture</b>           | Clean Architecture, MVVM Pattern, OOP                                                                  |
| <b>UI / UX</b>                | Material Design, Custom Widgets, Responsive Layouts, Animations                                        |
| <b>Version Control</b>        | Git, GitHub — branching, PRs, code review                                                              |
| <b>Tools &amp; IDE</b>        | VS Code, Android Studio, Postman, Git/GitHub, Firebase, GitHub Copilot, AI-assisted Development Tools. |
| <b>Concepts</b>               | RESTful APIs, SDLC, Push Notifications, Offline-First Storage                                          |

## TRAINING & CERTIFICATIONS

### Mobile Development Trainee — Flutter

Feb 2026 – Mar 2026

[National Telecommunication Institute \(NTI\) — Egypt](#)

- ▶ Completed an intensive 2-month professional training program in mobile application development using Flutter and Dart.
- ▶ Covered advanced topics: state management, clean architecture, and professional-grade real-world app development practices.
- ▶ Most structured training experience to date — reinforced best practices in Flutter development and professional-grade code quality.

### Mobile Development Trainee — Flutter

2023

[Information Technology Institute \(ITI\) — Egypt](#)

- ▶ Specialized training in mobile application development with Flutter at one of Egypt's leading technology training institutions.
- ▶ Gained practical exposure to Flutter development workflows, UI building, and state management fundamentals.

**Certifications:** Flutter & Dart — Mobile Development Certificate • Git & GitHub — Version Control Certificate

---

## PROJECTS

### Home Nest — Home Services & Rental Platform | Flutter • Dart • Firebase • BLoC

- Built a full cross-platform mobile app (iOS & Android) connecting homeowners with service providers and renters — covering the full SDLC from requirements gathering to deployment.
- Designed a multi-role user system (client / provider) with dynamic permission-based UI, applying clean architecture and MVVM pattern for maintainability and testability.
- Implemented real-time data sync using Firebase Firestore and secure authentication flows with Firebase Auth.
- Integrated push notifications and in-app messaging to enhance user engagement.
- Applied BLoC state management throughout — demonstrating reactive programming and separation of concerns.

### Dental Clinic Management System — Graduation Project | Flutter • Dart • Firebase

- Delivered a comprehensive clinic management system for Sinai University's dental faculty, handling appointments, patient records, and doctor scheduling.
- Translated stakeholder interviews into functional technical specifications and designed complex relational data models in Firebase Firestore for multi-department workflows.
- Built an admin dashboard for real-time monitoring of clinic operations — designed for non-technical end users.
- Covered full architecture decisions, database modeling, and UI design for multiple user roles under real deadlines.

### Quiz App | Flutter • Dart • Provider

- Built an interactive quiz application with multiple categories, score tracking, and result summaries.
- Applied Provider pattern for clean separation of UI and business logic — state flows clearly through the widget tree.

### Task Manager App | Flutter • Dart • Local Storage

- Developed a productivity app with full CRUD operations, using offline-first local persistence — demonstrating data storage strategies beyond cloud solutions.

### BMI Calculator App | Flutter • Dart

- Created a clean BMI calculator with animated result indicators using Flutter animation APIs, focused on pixel-perfect UI and custom widget design.

---

## EDUCATION

### Bachelor of Information Technology & Computer Science

2020 – 2024

Sinai University — Faculty of Computer Science, Egypt

Relevant coursework: OOP, Data Structures & Algorithms, Software Engineering, Database Systems, Mobile Application Development, Computer Networks.
